COMPANY

About Us

OUR SPECIALTY

Structural steel and metal works are at the core of all our production fields. We deliver a wide range of products and proficient services, with guaranteed efficiency and long-term customer satisfaction.

70 YEARS OF COMMITMENT

Since 1948, Parissis has developed a unique expertise in steel processing solutions. The company has expanded its products to adapt to evolving market needs, and has grown to work on both local and regional high profile projects.

A CLIENT CENTRIC COMPANY

Parissis is associated with quality work, timely delivery, and reliability. We emphasize our position as your partner, as we give personal attention to each client, and are proactive in finding solutions that will best achieve your goals.

We've known steel for 70 years...

Our company is certified by ISO for organizational management and has received certificates of conformity according to EN1090 for the manufacture and assembly of steel structures.

Key To Our Success

For the past years, integrity, motivation, and expertise have been transferred from one generation to another at Parissis, resulting in a growing enthusiastic workforce, eager to exceed our clients' expectations.

Our Services

We provide our customers with technical and manufacturing expertise for long-term turnkey solutions, and extend our services to every stage of a project.

DESIGN & ENGINEERING

Using the best technology, from finite element analysis to BIM (Building Information Modeling) software, our structural engineers support you throughout the project by providing you with:

- Structural design services along with technical and financial optimization of structures
- 3D visualization to assess all details in advance
- 2D detail engineering with shop drawings, manufacturing, and assembly, improving overall project delivery
- We focus on designing a safe structure without compromising desired aesthetics and functions, ensuring an economical design that meets your needs.

FABRICATION

1

All our raw materials are certified according to international standards and tested upon arrival at our factory.

2

We undertake complete assembly of a full scale mock-up of the structures at our premises prior to dispatch, to ensure quality and productivity on site.

3

Parissis has invested in state-of-the-art machinery and a skilled workforce at every stage of the process, reaching a capacity of 3000 tons per year, maintaining the highest quality standards.

4

All our products are treated and painted according to ISO EN 12944 standards, before being carefully packed and loaded into containers.

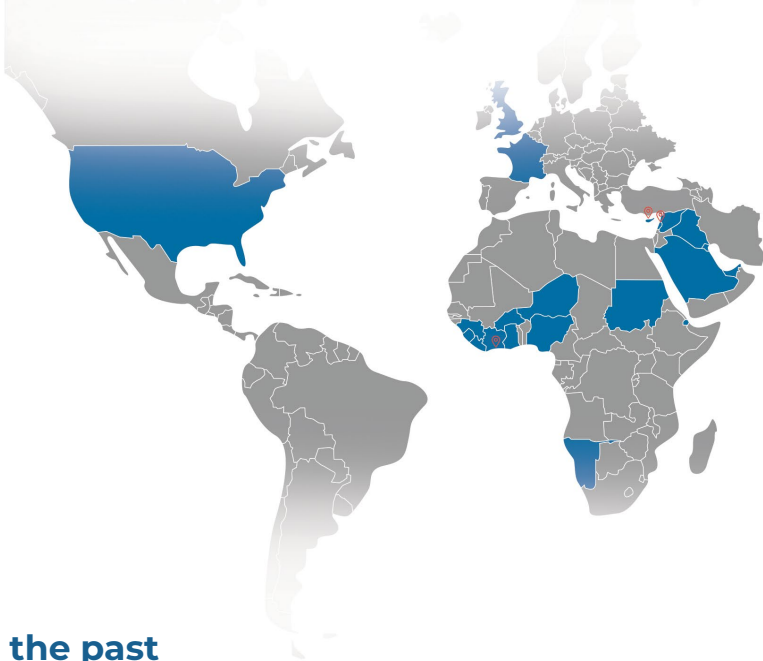

INSTALLATION

With more than 50 years of experience and professionalism, we have the ability to meet international standards during the installation of our works, by having a clear methodology for each project, while adapting to local specificities to best satisfy customer needs.

Global Reach

Our global presence is established through strategically located offices, and a team of highly qualified and educated young professionals. We carry out projects on four different continents, demonstrating our ability to provide global solutions that meet the specific needs of our customers.

Over the past 15 years.
